CONTENTS OF VOL. 81 Nos 1–12

NUMBER 1—JANUARY

The mechanism of degradation of Ag/Ni multilayers deposited at different temperatures
K. O. Schweitz, J. Bøttiger, A. L. Greer, P. J. Thomas and D. T. Foord 1

Investigation of the phase constitution and structure of rapidly solidified hard magnetic $Nd_{18}Fe_{76}B_6$ ribbons by transmission electron microscopy
M. A. Al-Khafaji, I. Ahmad, W. M. Rainforth, H. A. Davies and R. A. Buckley 11

TEM/HREM observations of nanostructured superplastic Ni_3Al
R. Z. Valiev, C. Song, S. X. McFadden, A. K. Mukherjee and R. S. Mishra 25

High-strain-rate superplasticity from nanocrystalline Al alloy 1420 at low temperatures
R. S. Mishra, R. Z. Valiev, S. X. McFadden, R. K. Islamgaliev and A. K. Mukherjee 37

An X-ray diffraction study of strain localization and anisotropic dislocation contrast in nanocrystalline titanium
P. Chatterjeé and S. P. Sen Gupta 49

Pt–Si reaction through interfacial native silicon oxide layers
E. Conforto and P. E. Schmid 61

The vacancy wind effect for chemical diffusion in intermetallic compounds
G. E. Murch and I. V. Belova 83

A new interpretation of tracer diffusion in Co–Ga
I. V. Belova and G. E. Murch 95

The effect of stress on cubic-to-tetragonal phase transitions in Mg_2TiO_4 and Mg_2GeO_4 spinel films
St. Senz, W. Blum and D. Hesse 109

Misfit dislocation cross-slip at the first stages of plastic relaxation in low-mismatch heterostructures
M. Putero, N. Burle and B. Pichaud 125

Broadening of the tilt-effect peak in the drag of dislocations in metals due to chaotic scattering of electrons
E. Vigueras, A. A. Krokhin, T. J. McKrell and J. M. Galligan 137

The deformation regimes of the yield point of silicon
H. Siethoff and H. G. Brion 145

Non-equilibrium segregation during alloy solidification
M. E. Glicksman and R. N. Hills 153

The deformation of Nb–Zr–N single crystals containing zirconium nitride particles
I. Mechanical properties
P. Manyum and G. Taylor 161

Hexagonal-phase retention in pressureless-sintered barium titanate
M.-H. Lin and H.-Y. Lu 181

Strain ratchetting of titanium upon reversible alloying with hydrogen
M. Frary, C. Schuh and D. C. Dunand 197

Yield stress anomalies in single crystals of Ti–54.5 at.% Al
III. Ordinary slip
S. Jiao, N. Bird, P. B. Hirsch and G. Taylor 213

Atomic-scale quantitative elemental analysis of boundary layers in a $SrTiO_3$ ceramic condenser by high-angle annular dark-field electron microscopy
M. Kawasaki, T. Yamazaki, S. Sato, K. Watanabe and M. Shiojiri 245

NUMBER 2—FEBRUARY

Crystallographic characterization of sputter-deposited epitaxial Nb–Cu–Co and Nb–Cu–Permalloy multilayers using electron back-scatter diffraction patterns
R. Loloee, W. P. Pratt Jr and M. A. Crimp 261

Effects of surface damaging and overcoating on the formation of hillocks and whiskers on pure Al films deposited on to a glass substrate
H. Saka, Y. Suzuki, S. Fujino, K. Haruta, H. Takatsuji, K. Tsujimoto and S. Tsuji 275

Electron microscopy observation of whiskers and hillocks formed on an Al film deposited on to a glass substrate
K. Tsujimoto, S. Tsuji and H. Saka 287

Phason and phonon contributions to the diffraction pattern of $(\sqrt{3} \times \sqrt{3})$-type hexagonal layers
J. Wolny, S. Kapral and L. Pytlik 301

Effect of static displacements of the host atoms on short-range order in the hydrogen subsystem of Ni–H solution
R. V. Chepulskii and V. A. Tatarenko 311

A first-principles study of the theoretical strength and bulk modulus of hcp metals
Y. Song, R. Yang, D. Li and Z. X. Guo 321

Migration kinetics of the self-interstitial atom and its clusters in bcc Fe
N. Soneda and T. Diaz de la Rubia 331

Transmission of the deformation through γ–γ interfaces in a polysynthetically twinned TiAl alloy
I. Ordered domain interfaces (120° rotational)
S. Zghal, A. Coujou and A. Couret 345

Transmission of the deformation through γ–γ interfaces in a polysynthetically twinned TiAl alloy
II. Twin interfaces (180° rotational)
S. Zghal and A. Couret 365

Microstructural shape evolution of γ′ in nickel-based superalloys by stress-assisted diffusion
R. Z. Shneck 383

Cyclic deformation behaviour of a copper bicrystal with common primary slip planes
Z. F. Zhang and Z. G. Wang 399

High-resolution and conventional electron microscopy study of a $\Sigma = 3$, [101]{121} twin grain boundary in molybdenum
T. Vystavěl, J. M. Pénisson and A. Gemperle 417

Phenomenological coefficients for transport by dumbbell mechanisms in a dilute random bcc alloy
S. Sharma, D. K. Chaturvedi, I. V. Belova and G. E. Murch 431

Indentation of elastically anisotropic half-spaces by cones and parabolae of revolution
J. G. Swadener and G. M. Pharr 447

On the existence of superlattice intrinsic stacking fault–superlattice extrinsic stacking fault coupled pairs in an $L1_2$ alloy
G. F. Dirras and J. Douin 467

***In-situ* X-ray diffraction study of single-slip-conditioned copper single crystals during uniaxial deformations**
K. H. Kim and Y. M. Koo 479

Initial stages of the transformation of single-crystal anatase particles during high-energy ball milling
T. Girot, X. Devaux, S. Bégin-Colin, G. Le Caër and A. Mocellin 489

On the temperature coefficient of resonant frequency in microwave dielectrics
I. M. Reaney, P. Wise, R. Ubic, J. Breeze, N. McN. Alford, D. Iddles, D. Cannell and T. Price 501

α → ω-phase transformation in titanium induced by power ion-beam irradiation
V. Lavrentiev, C. Hammerl, B. Rauschenbach, A. Pisanenko and O. Kukharenko 511

NUMBER 3—MARCH

Extrinsic factors influencing the yield stress anomaly of Al-rich γ-TiAl
F. Grégori, P. Penhoud and P. Veyssière 529

Influence of precipitates on the microstructure and texture during the rolling of Al–Cu and Al–Mn single crystals with rolling texture orientations
O. Engler, X. W. Kong and K. Lücke 543

Experimental observations of intersonic crack growth in asymmetrically loaded unidirectional composite plates
D. Coker and A. J. Rosakis 571

Diffraction analysis of internal strain–stress fields in textured, transversely isotropic thin films: theoretical basis and simulation
M. Leoni, U. Welzel, P. Lamparter, E. J. Mittemeijer and J.-D. Kamminga 597

High-resolution transmission electron microscopy and electron-energy-loss spectroscopy study of the phase $Mg_2Zr_5O_{12}$ in MgO-partially stabilized zirconia
Z. Liu and A. E. C. Spargo 625

Studies of the local release factors at a structure phase transition for Mn^{2+} in $RbCaF_3$ and $RbCdF_3$ crystals
W.-C. Zheng and S.-Y. Wu 637

Grouping method for the approximate solution of a kinetic equation describing the evolution of point-defect clusters
S. I. Golubov, A. M. Ovcharenko, A. V. Barashev and B. N. Singh 643

Plastic deformation of C_{60} single crystals
T. Komatsu, M. Tachibana and K. Kojima 659

Misfit dislocations in epitaxial heterostructures with different elastic constants of the substrate and epitaxial layer
E. Vigueras, E. Feldman, V. Yurchenko, L. Gumen and A. Krokhin 667

A structural model of defects in β-Si_3N_4 produced by neutron irradiation
M. Akiyoshi, T. Yano and M. L. Jenkins 683

Brittle-to-ductile transitions in the fracture of silicon single crystals by dynamic crack arrest
B. J. Gally and A. S. Argon 699

Initial stages of Fe–C martensite decomposition
K. Han, M. J. van Genderen, A. Böttger, H. W. Zandbergen and E. J. Mittemeijer 741

On the locking of dislocations by oxygen in silicon
S. Senkader, K. Jurkschat, D. Gambaro, R. J. Falster and P. R. Wilshaw 759

NUMBER 4—APRIL

Modelling of site occupancies in ternary B2 compounds in Nb–Ti–Al
R. Banerjee, S. Amancherla, S. Banerjee, I. P. Jones and H. L. Fraser 777

Periodic microtwinning as a possible mechanism for the accommodation of the epitaxial film–substrate mismatch in the $La_{1-x}Sr_xMnO_3/SrTiO_3$ system
O. I. Lebedev, G. Van Tendeloo, S. Amelinckx, F. Razavi and H.-U. Habermeier 797

Can fresnoite ($Ba_2TiSi_2O_8$) incorporate Ti^{3+} when crystallizing from highly reduced melts?
T. Höche, H.-J. Kleebe and R. Brydson 825

Modelling the effects of texture on the statistics of stage I fatigue crack growth
A. J. Wilkinson 841

Free-surface deformation of irradiated solids
J. Colin, D. Lesueur and J. Grilhé 857

The formation of domain boundaries in the I_W phase of Y–Si–Al–O–N and Er–Si–Al–O–N
I. MacLaren, L. K. L. Falk, A. Díaz and S. Hampshire 867

Ordered states in ternary B2-type intermetallic alloys including vacancies
F. W. Schapink 883

Variational bounds for the effective moduli of heterogeneous piezoelectric solids
J. Y. Li and M. L. Dunn 903

Atomistic and electronic structure of $Al/MgAl_2O_4$ and $Ag/MgAl_2O_4$ interfaces
R. Schweinfest, S. Köstlmeier, F. Ernst, C. Elsässer, T. Wagner and M. W. Finnis 927

Strength of nanoscale polycrystalline copper under shear
P. Heino and E. Ristolainen 957

Simulations of dislocation glide in overaged precipitation-hardened crystals
V. Mohles 971

Determining the range of forces in empirical many-body potentials using first-principles calculations
M. I. Baskes, M. Asta and S. G. Srinivasan 991

Axisymmetric deformation of piezoelectric multilayers
B. L. Wang and N. Noda 1009

NUMBER 5—MAY

Michael S. Duesbery: Commemorative Issue

Dr Michael S. Duesbery: an appreciation
P. B. Hirsch 1021

Microporous fine-grained copper: structure and properties
K. S. Kumar, M. S. Duesbery, N. P. Louat, V. Provenzano and M. S. DiPietro 1023

Climb/glide dislocation sources at low-misfit Ge_xSi_{1-x}–Si(001) interfaces
S. Jiao, P. B. Hirsch and D. D. Perovic 1041

Cross-slip of superpartial dislocations in iron aluminides
V. Paidar 1065

Stacking-fault energy and yield stress asymmetry in molybdenum disilicide
T. E. Mitchell, M. I. Baskes, S. P. Chen, J. P. Hirth and R. G. Hoagland 1079

Temperature rise due to fast-moving dislocations
J. Th. M. De Hosson, A. Roos and E. D. Metselaar 1099

Deformation of copper single crystals to large strains at 4.2 K
I. Mechanical response and electrical resistivity
M. Niewczas, Z. S. Basinski, S. J. Basinski and J. D. Embury 1121

Deformation of copper single crystals to large strains at 4.2 K
II. Transmission electron microscopy observations of defect structure
M. Niewczas, Z. S. Basinski and J. D. Embury 1143

The core structure, recombination energy and Peierls energy for dislocations in Al
G. Schoeck 1161

On the restraint offered by particles and voids to the motion of grain boundaries
N. P. Louat 1177

Image force on a dislocation in a bcc bicrystal: computer investigation of core effects
P. Beauchamp and J. Lépinoux 1187

On transition temperatures in the plasticity and fracture of semiconductors
P. Pirouz, J. L. Demenet and M. H. Hong 1207

Stochastic analysis of two-dimensional grain growth
C. S. Pande, R. A. Masumura and S. P. Marsh 1229

Multiple-dislocation emission from the crack tip in the ductile fracture of Al
D. Farkas, M. Duranduru, W. A. Curtin and C. Ribbens 1241

Parameter-free modelling of dislocation motion: the case of silicon
V. V. Bulatov, J. F. Justo, W. Cai, S. Yip, A. S. Argon, T. Lenosky, M. de Koning and T. Diaz de la Rubia 1257

Role of crack tip plasticity in fatigue crack growth
K. Sadananda and D.-N. V. Ramaswamy 1283

***Ab-initio* simulation of isolated screw dislocations in bcc Mo and Ta**
C. Woodward and S. I. Rao 1305

Atomistic simulations of $(a/2)\langle 111\rangle$ screw dislocations in bcc Mo using a modified generalized pseudopotential theory potential
S. I. Rao and C. Woodward 1317

The Peierls–Nabarro model and the mobility of the dislocation line
B. Joós and J. Zhou 1329

Towards thermodynamics of elastic electric conductors
M. Grinfeld and P. Grinfeld 1341

Accurate atomistic simulation of $(a/2)\langle 111\rangle$ screw dislocations and other defects in bcc tantalum
L. H. Yang, P. Söderlind and J. A. Moriarty 1355

Atomistic study of non-Schmid effects in the plastic yielding of bcc metals
K. Ito and V. Vitek 1387

Thermal activation under shear
J. W. Cahn and F. R. N. Nabarro 1409

NUMBER 6—JUNE

Spectral analysis of acoustic emission during cyclic deformation of copper single crystals
A. Vinogradov, V. Patlan and S. Hashimoto 1427

Classification of γ–γ and γ–α_2 lamellar boundaries on the basis of continuity of strains and slip–twinning planes in fatigued TiAl polysynthetically twinned crystals
T. Nakano, H. Biermann, M. Riemer, H. Mughrabi, Y. Nakai and Y. Umakoshi 1447

Electron channelling contrast imaging characterization of dislocation structures associated with extrusion and intrusion systems and fatigue cracks in copper single crystals
J. Ahmed, A. J. Wilkinson and S. G. Roberts 1473

The first stage of stress relaxation in tensile strained $In_{1-x}Ga_xAs_{1-y}P_y$ films
X. Wu and G. C. Weatherly 1489

High resolution transmission electron microscopy of dislocation core dissociations in gold and iridium
T. J. Balk and K. J. Hemker 1507

The structure of FeCo/Ag multilayers
L.-C. Wang, W. M. Rainforth, H. J. Hatton, M. D. Cooke, C. J. D. Hetherington and M. R. J. Gibbs 1533

Physical vapour deposition growth and transmission electron microscopy characterization of epitaxial thin metal films on single-crystal Si and Ge substrates
K. H. Westmacott, S. Hinderberger and U. Dahmen 1547

History effects in anodic oxidation of Al–W alloys
L. Iglesias-Rubianes, P. Skeldon, G. E. Thompson, H. Habazaki and K. Shimizu 1579

Morphological study of Cr smoke particles with A15 structure
M. Arita, N. Suzuki and I. Nishida 1597

Structural properties of heteroepitaxial germanium–carbon alloys grown on Si (100)
D. J. Smith, M. Todd, J. McMurran and J. Kouvetakis 1613

First-principles study of the elastic properties and electronic structure of NiTi, CoTi and FeTi
D. Y. Cheng, S. J. Zhao, S. Q. Wang and H. Q. Ye 1625

Observation and modelling of propagating Portevin–Le Châtelier deformation bands in Cu–15 at.% Al polycrystals
P. Hähner, A. Ziegenbein and H. Neuhäuser 1633

NUMBER 7—JULY

Influence of structural variations on high-resolution electron microscopy images of poly[1,6-di(*N*-carbazolyl)2,4-hexadiyne] nanocrystals
C. Kübel and D. C. Martin 1651

Origin of diffuse electron scattering in yttria-cubic-stabilized zirconia single crystals with 24–32 mol% yttria
A. Gallardo-López, J. Martínez-Fernández, A. Domínguez-Rodríguez and F. Ernst 1675

Martensitic structures and deformation twinning in the U–Nb shape-memory alloys
R. D. Field, D. J. Thoma, P. S. Dunn, D. W. Brown and C. M. Cady 1691

The ideal strength of tungsten
D. Roundy, C. R. Krenn, M. L. Cohen and J. W. Morris, Jr 1725

Behaviour of the diffusion vacancy-wind factors in the concentrated random alloy
I. V. Belova and G. E. Murch 1749

Modelling of the Gibbs adsorption at transition-metal–oxide interfaces: effect of the oxygen chemical potential on interfacial bonding, interfacial energy and equilibrium precipitate shape
M. Backhaus-Ricoult 1759

On the sources of work hardening in multiphase steels assisted by transformation-induced plasticity
P. Jacques, Q. Furnémont, A. Mertens and F. Delannay 1789

The mechanism of hydrogen-facilitated anodic-dissolution-type stress corrosion cracking: theories and experiments
S. X. Mao, B. Gu, N. Q. Wu and L. Qiao 1813

A simple model of atomic interactions in noble metals based explicitly on electronic structure
A. P. Sutton, T. N. Todorov, M. J. Cawkwell and J. Hoekstra 1833

A dislocation-based analysis of strain history effects in ice
D. M. Cole and G. D. Durell 1849

NUMBER 8—AUGUST

The shapes of two-phase particles: the case of trapped voids in lead particles embedded in silicon
D. Chatain, P. Wynblatt and S. Hagège 1873

Anomalous internal-friction peaks observed in very-high-purity aluminium
A. Rivière 1887

Non-isothermal strain recovery as a result of irreversible structural relaxation of metallic glasses
K. Csach, Yu. A. Filippov, V. A. Khonik, V. A. Kulbaka and V. Ocelik 1901

The invariant laws of the amorphization processes by mechanical alloying I. Experimental findings
F. Delogu, L. Schiffini and G. Cocco 1917

Interfacial microstructures of rf-sputtered TiNi shape memory alloy thin films on (100) silicon
S. K. Wu, J. Z. Chen, Y. J. Wu, J. Y. Wang, M. N. Yu, F. R. Chen and J. J. Kai 1939

***A priori* determination of the sampling size for grain-boundary character distribution and grain-boundary degradation analysis**
B. Alexandreanu and G. S. Was 1951

Characterization of silicide precipitates in Nb–Si and Nb–Ti–Si alloys
R. J. Grylls, B. P. Bewlay, H. A. Lipsitt and H. L. Fraser.....1967

Thermally induced failure of multilayer ceramic structures
E. P. Busso, Y. Tkach and R. P. Travis.....1979

A micromechanics study on strain-localization-induced fracture initiation in bending using crystal plasticity models
M. Dao and M. Li.....1997

Hardness in Ag/Ni, Au/Ni and Cu/Ni multilayers
K. O. Schweitz, J. Chevallier, J. Bøttiger, W. Matz and N. Schell.....2021

Surface constrained plasticity: oxide rupture and the yield point process
D. E. Kramer, K. B. Yoder and W. W. Gerberich.....2033

Monitoring the precipitation reactions in a cold-rolled Al–Mn–Mg–Cu alloy using thermoelectric power and electrical resistivity measurements
S. I. Vooijs, S. B. Davenport, I. Todd and S. van der Zwaag.....2059

Microstructural study of epitaxial platinum and Permalloy/platinum films grown on (0001) sapphire
S. Ramanathan, B. M. Clemens, P. C. McIntyre and U. Dahmen.....2073

NUMBER 9—SEPTEMBER

***In situ* study of the continuous cooling transformation behaviour of Ti–Al alloys within the two-phase ($\alpha + \gamma$) region**
J. S. Kim, J. K. Park, C. H. Chun and G. H. Kim.....2095

Relaxation of coherency stresses by dislocation networks in lamellar γ-TiAl
G. Saada and A. Couret.....2109

Structural relationship between the μ phase and the λ phase in the Al–Mn system
M. Uchida and Y. Matsui.....2121

Phase transitions of copper precipitates in Fe–Cu alloys
J. J. Blackstock and G. J. Ackland.....2127

Mechanical loss spectrum of aged Al–Mg–Si alloys
C. Xie, E. Carreño-Morelli, R. Schaller, Y. Pitton and R. C. Fornerod.....2149

Snow as a foam of ice: plasticity, fracture and the brittle-to-ductile transition
H. O. K. Kirchner, G. Michot, H. Narita and T. Suzuki.....2161

Transmission electron microscopy investigation of fatigue crack tip plastic zones in a polycrystalline γ-TiAl-based alloy
Z. W. Huang, P. Bowen and I. P. Jones.....2183

Contribution of the fluorescence to conversion electron yield X-ray absorption fine-structure measurements
O. Proux, J. Mimault and T. Girardeau 2199

Two-dimensional foam fragmentation produced by traversing pins
M. A. Fortes and J. M. Albuquerque 2217

Foam patterning by traversing pins
J. M. Albuquerque and M. A. Fortes 2233

Grain-boundary migration in the presence of diffusing impurities: simulations and analytical models
M. I. Mendelev, D. J. Srolovitz and W. E 2243

Domain-boundary structures in Ce-doped α-(Si–Al–O–N)
F. F. Xu, Y. Bando, C. M. Wang and M. Mitomo 2271

Low-cycle fatigue of a nickel-based superalloy at high temperature: simplified micromechanical modelling
V. Brien, L. P. Kubin and B. Decamps 2285

Effect of polarization saturation on the stress intensity factor for a crack in an electrostrictive ceramic
H. G. Beom 2303

Erratum: A unified model for point-defect formation in B2 intermetallic compounds
X. Ren and K. Otsuka 2315

NUMBER 10—OCTOBER

Growth of niobium nitride/aluminium nitride trilayers and multilayers
S. J. Lloyd, D. M. Tricker, Z. H. Barber and M. G. Blamire 2317

Growth mechanisms to explain the primary and secondary habits of snow crystals
J. Nelson 2337

Transient ordering states in decagonal Al–Co–Ni and Al–Cu–Co–Si phases
E. Weidner, F. Frey and K. Hradil 2375

A comparative study of precipitate composition and volume fraction in an Al–Zn–Mg alloy using tomographic atom probe and small-angle X-ray scattering
A. Deschamps, A. Bigot, F. Livet, P. Auger, Y. Bréchet and D. Blavette 2391

Effect of Cr and Si additions on the continuous-cooling-transformation kinetics of γ-based Ti–45 at.% Al alloy
C. Y. Lee and J. K. Park 2415

Local atomic arrangements in polytetrahedral materials
II. Coordination polyhedra with 14 and 15 atoms
V. A. Borodin 2427

The transition from Harrison type-B to type-A kinetics in grain-boundary tracer diffusion
I. V. Belova and G. E. Murch 2447

An extended Cahn–Hilliard model for interfaces with cubic anisotropy
T. A. Abinandanan and F. Haider 2457

Strain relaxation and dislocation introduction in lattice-mismatched InAs/GaP heteroepitaxy
V. Gopal, A. L. Vasiliev and E. P. Kvam 2481

Relaxation of thermal concentration fluctuations in ternary liquids
P. J. Desre and A. Gusak 2503

Reaction kinetics of glissile interstitial clusters in a crystal containing voids and dislocations
A. V. Barashev, S. I. Golubov and H. Trinkaus 2515

On recoil-energy-dependent defect accumulation in pure copper
Part II. Theoretical treatment
S. I. Golubov, B. N. Singh and H. Trinkaus 2533

NUMBER 11—NOVEMBER

The effect of low strain and annealing iterations on the ductility of alpha-brass
H. Davies and V. Randle 2553

Thermal generation of vacancies from voids in aluminium
K. Ono and T. Kino 2565

X-ray diffraction study of a phason strain in an Al–Cu–Fe icosahedral quasicrystal
M. Jono, Y. Matsuo, K. Yamamoto and Y. Ishii 2577

Calculation of point-defect entropy in metals
Y. Mishin, M. R. Sørensen and A. F. Voter 2591

Comparison of atomic force microscopy and transmission electron microscopy of second-phase particles
U. Lagerpusch, B. Anczykowski and E. Nembach 2613

Grain refinement in copper under large strain deformation
A. Belyakov, T. Sakai, H. Miura and K. Tsuzaki 2629

Quasicrystals: tiling versus clustering
E. A. Lord, S. Ranganathan and U. D. Kulkarni 2645

The effect of local composition on defect structure in a near-γ-TiAl alloy with duplex microstructure
S. H. Chen, G. Schumacher, D. Mukherji, G. Frohberg and R. P. Wahi 2653

Solubility and diffusion of cobalt in alumina
E. G. Gontier-Moya, G. Erdélyi, F. Moya and K. Freitag 2665

A transmission electron microscopy study of polycrystalline $SrCo_{0.8}Fe_{0.2}O_{3-\delta}$ creep in the diffusion-to-power law transition regime
G. Majkic, M. Mironova and K. Salama 2675

Metastable microstructures in laser-ablation-deposited Al–Fe thin films
S. Bysakh, P. K. Das and K. Chattopadhyay 2689

The influence of yttria-stabilized zirconia surface pits on the initial stage of reactive $La_2Zr_2O_7$ formation from La_2O_3 vapours and yttria-stabilized zirconia (001) substrates
C. J. Lu, S. Senz and D. Hesse 2705

A Monte Carlo simulation of solidification structures of binary alloys
A. Das and E. J. Mittemeijer 2725

On dislocation interaction with radiation-induced defect clusters and plastic flow localization in fcc metals
N. M. Ghoniem, S.-H. Tong, B. N. Singh and L. Z. Sun 2743

NUMBER 12—DECEMBER

The geometrical properties of irregular two-dimensional Voronoi tessellations
H. X. Zhu, S. M. Thorpe and A. H. Windle 2765

Correlation between bond energies and point-defect behaviour in B2 intermetallics
M. P. Gururajan and T. A. Abinandanan 2785

Internal friction in a martensitic high-carbon steel
R. Bagramov, D. Mari and W. Benoit 2797

First-principles investigations of the solute–vacancy interaction energy and its effect on the creep properties of α-titanium
Q. M. Hu, D. S. Xu and D. Li 2809

Electron-irradiation-induced phase transformation and fractional volatilization in $(Mg, Fe)_2SiO_4$ olivine thin films
P. Carrez, H. Leroux, P. Cordier and F. Guyot 2823

Damage production yield by electron excitation in mica for ion and cluster irradiations
S. Bouffard, C. Leroy, S. Della-Negra, A. Brunelle and J. M. Costantini 2841

Nanostructured Co–Ag and Co–Pt thin films from clusters
M. Négrier, J. Tuaillon-Combes, V. Dupuis, P. Mélinon, A. Perez and A. Traverse 2855

Structure and microstructure of $La_{1-x}Sr_xMnO_3$ ($x \approx 0.16$) films grown on a $SrTiO_3$(110) substrate
O. I. Lebedev, J. Verbeeck, G. Van Tendeloo, S. Amelinckx, F. S. Razavi and H.-U. Habermeier 2865

Transmission electron microscopy studies of dislocations in physical-vapour-transport-grown silicon carbide
W. M. Vetter and M. Dudley 2885

Structural features of Ag–1 wt% Mg alloys internally oxidized at high temperatures investigated by X-ray diffraction
S. Polizzi, G. Fagherazzi, T. Finotto, S. Ceresara and G. Giunchi 2903

Extended X-ray absorption fine-structure study of the hydrogen location in a Ti–Zr–Ni icosahedral quasicrystal and a 1/1 bcc crystal approximant
A. Sadoc, J. Y. Kim and K. F. Kelton 2911

Erratum: Thermal generation of vacancies in high-quality aluminium crystals
H. Osono, E. Hashimoto and T. Kino 2925

Erratum: The shapes of two-phase particles: the case of trapped voids in lead particles embedded in silicon
D. Chatain, P. Wynblatt and S. Hagége 2927

Subject index 2929

Index of authors (with titles of papers) 2933
